Where learning has a purpose

Decoding Rhyming words

Remember the famous Dr. Seuss book *The Cat in the Hat*? It was a rhyming fantasy! We would have thought it was a funny little book, but actually Dr. Seuss was right on track with helping you improve your reading skills. The Kindergarten teachers of Kangaroo Kids are in the same track. Learning rhyming words and solving puzzles? Aren't our teachers better than Dr. Seuss? One would say yes for an answer!

Multiplication and Divisions

4th graders were introduced to Multiplication by using a jigsaw puzzle and even the inverse of the same ie Division. Together they had fun in both solving the puzzle and learning this important skill in mathematics.

Beyond the board game

An awesome skill-builder, a very versatile game and all you need is a gigantic dice, some paper, and a pencil! This is how the Senior KG students learned addition. They rolled the dice and added their way into mathematics!

TINY LITTLE SEEDS

Have you heard the story of the tiny little seed? The tiny seed knew that in order to grow it needed to be dropped in dirt, covered in darkness and struggle to reach the light. Grade 2 had a real time study on germination of seeds. They learned the Scientifics behind germination and were inspired by the ‘NEVER GIVE UP’ motto of the tiny little seeds.

Number your way!

Children begin learning numbers from everyday experiences. They hear numbers in conversations, nursery rhymes, songs, poems and picture books, they watch their parents print numbers and count out cookies for lunches. Junior KG teachers had an outside the box method to teaching numbers. The children guided a ball through the nook and corner of the numbers and experienced learning at an all new level.
