Where learning has a purpose

Zapping with Electricity!

Eureka !!! Electrical engineers at BHIS-K! We were shocked to see a bunch of Thomas Alva Edisons igniting Paper bulbs by the power of their Brains and Hearts. They went all out to build a human circuit with books as electrons. They worked as a team and allowed the electrons to seamlessly flow through them. These 4th Grade Edisons are inspired to investigate and invent devices that will suit their needs. Wait and watch, we are sure that day is not too far.

What type of substance?

Are these substances acidic or alkaline?
Are they weak or strong?

Substance	pH	Description of acid/alkali
soda water	6	very weak ac
car battery acid	1	
soap	8	
washing soda	10	
stomach acid	2	
oven cleaner	14	
vinegar	4	

A young lecturer

There was a swap in duties as Jude of Grade 6 decided to don his teaching hat. He had a few tricks up his sleeves as he kept his presentation interactive and engaging. His science teacher was amazed by the budding professor of BHIS-K. The head boy surely seemed determined at his task! Kudos Young Man!

Newspapers and Debates!

Newspapers have been called the living textbook and it lives up to that name. The 5th Graders were intrigued by how the newspaper was filled with the various articles ranging from politics, economy, entertainment and what not? They paired up and glanced through the vocabulary offered, the information covered and tried their hand at identifying the various sections of a newspaper.

Following this they had a quick debate session. They debated on Print newspapers vs. online editions. The boys felt that as technology was exceeding human imagination, we should make use of it to the fullest. What better way than using online editions?

Being Newspaper enthusiasts the girls didn't agree. They pointed out how a print newspaper can be physically held in one's hand, and are everlasting and unchanging, whereas articles can be hidden away on an online website in a matter of a few days.

The debate was indeed a breezy activity that sharpened their critical thinking and presentation skills.

In this fast-paced world, people don't want to spend time fumbling through a print newspaper!

The feeling of a warm newspaper right off the press is one of my favorite feelings!

Celebrating Lights

Lights, Sweets and togetherness! Diwali vibes are full on at BHIS-K. The tiny tots of KKEL are vouching for a sustainable Diwali this year. They came together to hand paint beautiful earthen diyas. They were gleeful to show off their work of art!

Here they are wishing you A Happy Diwali! May this Diwali brighten up each heart with joy and prosperity!

BHIS-K, Two years of quick smart strides!

Two years of rigorous scaffolding and construction led to the creation of BHIS-K. Young tender minds have gathered here to begin their educational journey in this rustic location.
