Where learning has a purpose

International Women's Day

BHIS-K menfolk came together to put up a spectacular show celebrating the spirit of women hood. An ode to the empowered fairer sex, the visual treat was an exemplary display of the sensitivity and show of respect by the male staff.

The highlight of the day was a slideshow with a poignant voiceover by the Tamil Facilitator saluting the women who make the BHIS - K family. The voiceover as penned by our in-house Wordsmith was a testament to the everyday struggles and triumphs of the womenfolk of Billabong Kelambakkam. Silambatam by our Art Master and PE instructor had the audience whoop with delight. Our Music instructor wowed one and all with his inspired singing. Urging women to never give up, his rendition struck a chord with everyone.

Brain teasers to deduce the names of women achievers added to the adrenaline rush as the teachers racked their brains to come up with the correct answers. Hidden talents were unearthed as the Science Facilitator revealed his hidden instrumental skills. Our Resident Manager added a touch of soulful elegance with a meaningful rendition of an inspiring Hindi Song.

The show wound up with a collective hoot celebrating feminine essence and a promise to breed gender sensitivity among our young learners.

Shadowing the concepts

The exuberant bunch of 4th Graders shouldered the responsibility in validating universally accepted facts on shadows. They were brainstorming and investigating how shadows are affected by the angle and distance of the light source. Shadow makers, shadow trackers, and shadow police officers were seen doing their jobs religiously trying to decode how the shadows keep changing throughout the day.

Fork is the new brush!!

No matter the time of year, it's paradise to keep little hands busy, and this Painting with Forks activity has been an absolute winner in Nursery. Splashing paint across a canvas is fun. But using the legendary cutlery 'The Fork' to create a spring masterpiece was an enjoyable surprise for the little ones. They were quick at creating flowers that were unique and spectacular.

Verbs are fun

If you're studying French, you need to get a handle on French verbs. Luckily, our French teacher had a trick to change this complicated affair into something that the children absolutely love! A dice and a board filled with possible regular verbs were all that she needed and before she knew it the 5th graders were seen playing the game while conjugating verbs into simple and compound tenses.

Conquering history

The 1st graders were seen voyaging towards the land of ancient monuments; Egypt! These budding historians were sailing through the great River Nile on Papyrus Reed boats as they recapitulated on the facts they had learned about the land of Pyramids and Sphinx.

Artistic Judge

Our joy knows no bounds as we have a bunch of good teachers, sculpting good students at our school. This M.F.Hussain of BHIS-K was the leading judge of a Face painting competition held at SRM college of Arts and Science. Mr.Yuvraj flaunted his artistic skills by sharing his treasure trove of knowledge to burgeoning artists of the College. This great artist was quick at spotting talent among the lot!! Professional as usual!! His paintings that adorn the walls of BHIS-K speaks for this.

From Technologist to a Teacher

Biotechnology and genetic engineering is an exciting field wherein tweaking of the genes is carried out to enhance throughput in every possible way. This basic approach has had an enormous impact in the fields of health, food, agriculture and environmental protection. One of our teachers, Ms. Shiny Shajil is an accomplished biotechnologist and an acclaimed post-graduate at the state-level. Having tweaked genes for quite a long time, she made the transition to tweak the brains of our Billabongers in an attempt to make academic clones of hers. Recently she was felicitated by Hindustan College of Arts and Science for securing Madras University first rank with gold medal in her PG studies. We commend her for her academic acuity and her teaching ability. We are indeed proud to have her as one of our faculty members and we look forward to seeing the success of her cloning attempts.
