Where learning has a purpose

A NEW WAY TO LEARN

Instilling presentation skills within our children is considered important and the ability of a child to convey information effortlessly determines the effectiveness of the lesson learned. Here at BHIS-K, children are groomed to become individuals who captivate through words. The 4th graders used a variety of materials such as printouts, digital imagery, PowerPoint presentations to complement their research report on the different types of dinosaurs. The immense confidence portrayed by the learners was impressive and made the lesson memorable.

Cherries

FLOWERS AND FRIENDS

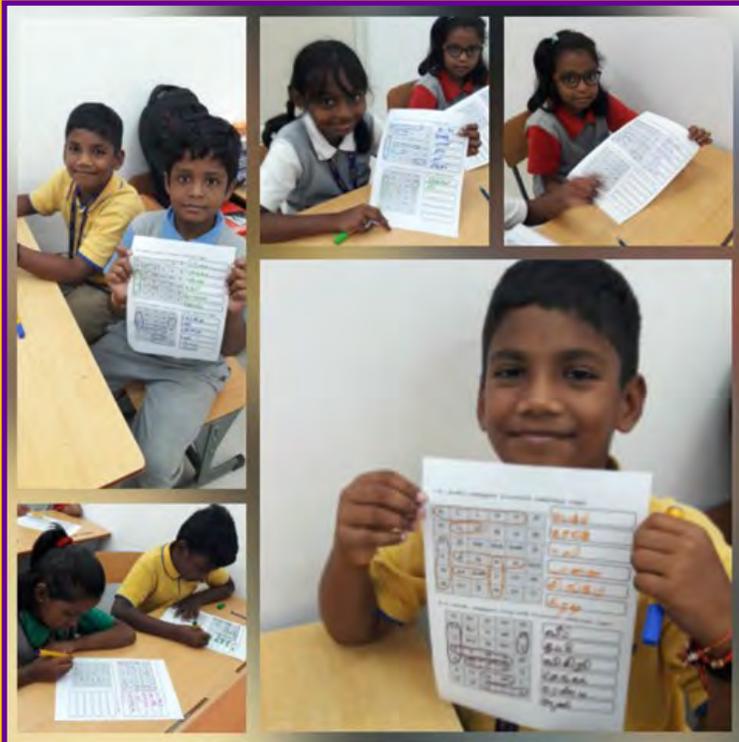

The Little cherries of grade 3 blossomed in tiny teams as they coloured flowers of friendship.

They learned about friendship and expressed themselves by writing down their views in the petals. It was an artistic way to enhance their vocabulary in Hindi!

புதியச் சொற்களை உருவாக்குதல்.

Grade 4 தமிழ் வகுப்பில் தமிழ் ஆசிரியர் மாணவர்கள் புதியச் சொற்கள் அறிய எழுத்துகளை சேர்த்து சொற்கள் உருவாக்கும் பணித்தாள் ஒன்றை மாணவர்களுக்கு கொடுத்தார். மாணவர்களும் ஆர்வமுடன் பணித்தாளில் உள்ள சொற்களை கண்டுப்பிடித்து எழுதினர். இதன் மூலம் புதிய சொற்களை உருவாக்கும் திறன், உச்சரித்தல், சொல்லாட்சித்திறனை மாணவர்கள் வகுப்பறையில் வளர்த்துக்கொள்கின்றனர்.

History Lessons Are Fun !!

As a part of their history lesson, the 6th graders learned how PRO's (Public relation officers) have a huge role to play in shaping leaders and celebrities. They discussed how Queen Elizabeth I was unique as she was her own PRO and was an exemplar of a dynamic leader.

To reaffirm their understanding of the importance of PROs, the students were divided into teams. Each team had a celebrity and the others role-played as PROs. After a stipulated prep time, the celebrities had to attend a press conference hosted by the Teacher. It was indeed a fun way to implement what was learned!

The Art Studio of BHIS-K is getting prettier by the day!!

Zooming in !!

The 6th graders were astonished by the beauty of Mother Nature and realized the importance of a microscope. Little did they know that the epithelial tissue of the onion stained with saffron would look like a well-organized monastery. Mr. Singaravelan the lab assistant demonstrated how to fix a slide to be observed under a microscope. Following the discovery, the students went on to fill in their observations. Nature is indeed magical.

THE AESTHETICS in ELECTROSTATICS

A subatomic particle called the electron has never ceased to amaze humanity with its puzzling nature. Its ubiquitous presence is seldom realised unless someone educates, that all physical interactions are essentially interactions between electrons. Children are familiar with magnetic force but its distant cousin the electrostatic force is not as popular. It is because they are relatively unaware of its manifestations until someone demonstrates its presence. The other day grade 8 students had a first-hand experience of the effects of transferring electrons from one substance to the other. They were baffled to see balloons bartering bits of paper and beads of water bending backward in response to those invisible forces. While the students were busy identifying the reasons for this phenomenon, we couldn't help but wonder; how electrifying the electrons are, metaphorically and literally.

Sandwiches, Anyone?

The 1st graders were enthusiastically involved in making sandwiches in the school kitchen. This cooking activity was an English lesson in disguise as the students were asked to state the verbs and nouns that were used to explain the process. And by the end of the session, the students also learned the nutritional value of the ingredients, thereby venturing into the concepts of science.

A Special Assembly

We had the immense pleasure of hosting Kailin Mundt, currently pursuing her postgraduate study in the American Graduate School of Paris in France, for the past six weeks. As part of her internship, Kailin brought to our school a wealth of knowledge and international experience in teaching the English Language. Staying in our campus along with the residential students of our school she forged a personal bond with them. Kailin conducted a few English classes across grades 1-8 and enjoyed an active interaction with all the students and teachers. As part of her program, Kailin organized a special assembly that saw a spirited participation from all the primary and middle graders. The kids from Grade 1-4 had an unique opportunity of learning and showcasing the Line Dance under her tutelage. Grooving in one or more lines or rows, all facing either each other or in the same direction the little ones sizzled in the beautifully choreographed moves involving a repeated sequence of steps. Set to the tunes of country and western music our learners tapped their foot to 'Foot loose and Old Town Road'. Students from Grade 5 to Grade 8 presented a short skit on the ill fated couple of Romeo and Juliet. Exposed to Shakespearean English, they made a diligent attempt to appreciate the beauty of Shakespeare's works and put their very best during their final performance. Some of the Fourth graders surprised her with a sweet rendition of a poem written by them for her. The assembly preparation and its stunning execution facilitated cross-cultural communication for students. The ever curious kids comprehended the depth and richness of other cultures while appreciating the need for diversity and inclusiveness. With the warm hospitality she experienced, Kailin shared her incredible experiences over the past few weeks. The assembly came to an end with her promise to stay in touch and keep the channels of learning always open.

Grandparent's Day Celebration

The Kangaroo Kids were all prepped up to host a party for their beloved grandmas and grandpas this Friday. The vibrant decorations and an all exclusive selfie corner was an effective touch to the splendor celebration. The Kangaroo Kid's sang a beautiful song especially for their grandparents and danced to a peppy number. The highlight of the celebration was the ramp walk by the nursery students. The tiny tots gracefully walked the ramp and flashed their adorable smiles which earned them a round of applause from the audience. A series of games for the grandparents took the celebration a notch higher as they participated energetically and competed against each other. The winners were given special badges and these badges were awarded to them by their grandchild adding a personal touch to the achievement. Concluding the celebration, the grandparents shared their valuable feedback and blessed the school and the students. Addressing the gathering the Chairperson Mr. Yasir Nainar expressed his gratitude to the teaching and non-teaching staff for helping achieve the core mission of the institution- "To provide Education and not just Literacy".
