Know your child !!

Mind Fresh in association with BHIS-K conducted an exclusive parent workshop to help sharpen the parenting skills of our parents. This workshop acted as a guide in coping up with the needs showcased by the children. Trainers from Mind Fresh, Ms. Jayamalini and Ms. Keerthi kindled the parenting skills and stressed upon the effective strategies to ensure good parenting goes hand in hand with the curious mind of today. Through the session, queries from the parents were cleared by interactive activities that involved recreating real-life scenarios thereby giving clarity to each solution offered.

EAT HEALTHY !!

The 5th graders were determined to make healthy eating easier. They were made aware that healthy eating is all about getting the correct amount of nutrients- proteins, carbohydrates, fat, vitamins and minerals in their diet. Hence with this in mind, they created a food pyramid by grouping the same types of nutrients on each shelf of the pyramid by keeping in mind the ideal quantities that must be consumed. And voila a food pyramid was made! This food pyramid was put up in their classroom and it now acts as a guide to get the right balance of nutritious food within their calorie range!

This has helped them in understanding the process of germination and helped analyse the conditions required for a seed to germinate. The admin staff also took them around the vegetable garden in our campus and briefed them about the process that goes into maintaining a garden.
