### Get tangled in a fairy tale!

Our Kangaroo kids got entangled in the story of Rapunzel as they witnessed their teachers enact the play during the session- A visit to the story land. As the play began there was a thunderous applause when Rapunzel made an appearance and the young minds were amazed to see the tower where Rapunzel was hidden away by the evil witch. As the story proceeded the children were at the edge of their seats while they witnessed the evil doings of the witch and they cheered on as Rapunzel was able to overcome all the obstacles in her life. It was a perfect fairytale enacted by their wonderful fairy godmothers indeed!

### LET'S GO SHOPPING !!

As part of our theme "At the Orchard and Vegetable Patch", Nursery students had an in-house activity to where they opened their own 'Farm Fresh Supermarket'. All the students were excited to visit the supermarket and bought some vegetables, fruits, and groceries and carried them in the paper bag made by their teachers. An all exclusive Fruzo juice shop added energy to the event!

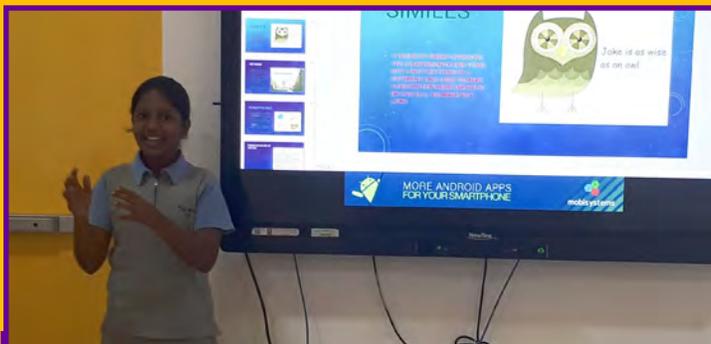

## Flower Puzzle

The 2nd graders were busy showing off their botanical skills as they tried to put together the parts of the flower. Their teacher had divided them into 2 groups and each group was busy putting together the shuffled parts of the flower in its right position on a paper. This group activity helped develop an understanding of the parts of a flower by setting a goal and working towards it collaboratively.

## Figures of Speech

Rakshitha and Eufrine of Grade 5 prepared their PowerPoint presentations on figures of speech and how those play a vital role in English Literature. Through their informative presentations, the class got the chance to go deeper into the world of figurative language used by writers and poets. It was an absolute delight to see these students present the topics so dexterously during the English class.

## Tic Tac Toe with Algebra

The sixth graders tried a new approach to working with variables and equations by playing a fun tic-tac-toe game. Partnering up to writing expressions, finding the value of variables and solving basic algebraic equations, the learners found that the game was a great resource for reviewing basic algebra. As the game proceeded to the next level the confidence of the young learners soared exponentially and they battled their wits to solve tricky problems. Who said Math isn't fun?

## தமிழ் சொற்களை அறிதல்

Grade 2 மாணவர்கள் தமிழ் ஆசிரியை நடத்திய "விட்டுச் செல்லாதே" பாடத்தை நடத்தினார். இப் பாடத்தின் மூலம் நாம் அன்றாடம் பயன்படுத்துகின்ற ஒவ்வொரு பொருளின் பெயரை தமிழில் கூறாமல் ஆங்கிலத்தில் சொல்லி வருகின்றோம். தற்போதைய நிலையில் உள்ள மாணவர்கள் தமிழில் உள்ள நடைமுறைச் சொற்களை மறந்து வருகின்றனர். இவற்றை தடுக்கவே ஆங்கிலத்தில் நாம் பயன்படுத்துகின்ற சொற்களை தமிழில் வண்ண அட்டையில் வரைந்தும், எழுதியும் கற்பிக்கப்படுவதால் மாணவர்கள் ஆர்வம் கொண்டு தமிழ்ச் சொற்களை அறிவதோடு மட்டும் அல்லாமல் வகுப்பறையில் ஆங்கிலத்தில் சொற்களின் பெயரைக் கூறாமல் தமிழில் சொல்லி வருகின்றனர்.

தமிழ் வாழ்க! தமிழ் வளர்க!

## आओ सीखें झ से झंडा

अक्षर ज्ञान के साथ-साथ राष्ट्रीयता की भावना जगाने के उद्देश्य से छात्रों को राष्ट्रीय ध्वज बनाकर उसमें रंग भरने के लिए कहा गया जिससे छात्रों की

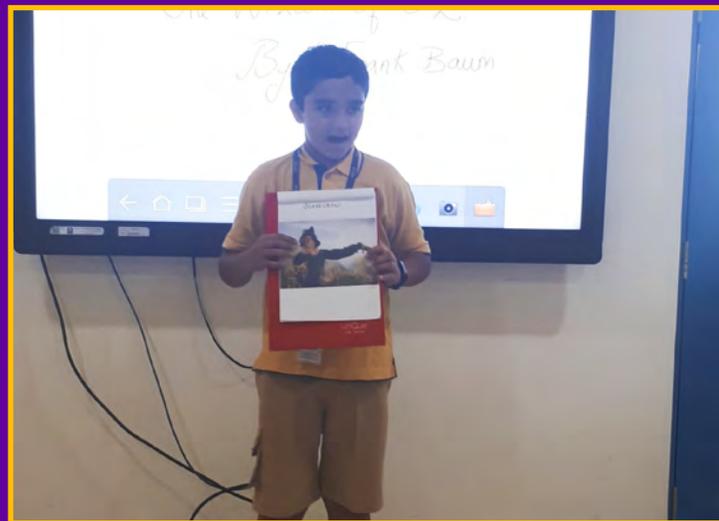

रचनात्मकता

का विकास हुआ और साथ ही साथ उन्होंने अक्षर को पहचानना सीखा।

## Character Sketch

The students of Grade 5 did a character sketch activity during the English class, wherein they pretended to be different characters from L. Frank Baum's novel, "The Wizard of Oz". The children were able to understand the characters' personalities and their importance to the plot of the story through this activity. Some of the characters enacted were Dorothy, the Scarecrow, the Tin Woodman and the Cowardly Lion.

## Let's have fun and learn

Global warming is the topic of greater concern and is still a problem which needs remedial measures to be taken at a faster pace. Inculcating the sense of responsibility within our future generation is one way that we can ensure it will be carried forward with better alternatives. The students of grade 4 were involved in a swirl of music and knowledge. The children enacted as Sun, Earth, suns radiation and the greenhouse gases. The children who were the greenhouse gases were told not to allow the children who were acting as suns radiation from moving out of the circle. So, this enabled the children to understand the concept that greenhouse gases are stronger and trap more heat. This lesson shall always help them remember the negative effects of greenhouse gases and evolve into citizens who minimizes the emission of such gases.

## Culminating their knowledge

Our students from Grade 1 to 4 hosted a grand culminating event where they showcased their knowledge gained in the various subjects during the 1st term. They displayed models and posters and explained the concepts to their friends, teachers, and Principal. All the classrooms were decorated based on the theme of the event and the students went on to conduct games and puzzles for their visitors. The 4th graders took the event up a notch by performing the play Matilda which was a hit amongst the audience. A splendid way to culminate learning, isn't it?
