Discovering life underwater

Our Sr.Kg and Nursery students of Kangaroo kids got an opportunity to visit an in-house aquarium which was filled with jelly sea animals like octopus, seahorses, crabs, dolphins, frogs, stingrays, lobsters and turtles. The young scuba divers were so excited to touch and see the sea creatures. It was a surprise for the children to witness all the sea creatures together housed in this in-house aquarium.

Hop a little! Jump a little! 2, 4, 6....!

The students of Jr. KG A&B joyfully and energetically learned the Math concept of "Skip Counting by 2" through an outdoor activity. Numbers were drawn on the floor and students were asked to Hop onto a number, skip a number and jump to the next right number. So students learned the concept easily and interestingly by hopping a little and jumping a little and went 2, 4, 6, 8....!!!

The Oxfordian way !!

Mr. Ammar Nainar who is currently pursuing his MA in International Relations (Asian studies) in Georgetown University- Washington DC stepped in to train our senior children about debating and the key components that are considered during the conduct of a debate. This session was aimed at prepping the children for a mock Oxford debate session scheduled to occur next week.

Join the band

The 5th graders took it up as an initiative to spread the importance of protecting monuments by creating posters and sharing with their friends from across all the grades. They pointed out the need, ways, and significance of protecting monuments of the world.

Peer learning

Our 2nd graders as an inter-disciplinary approach crafted a beautiful human skeleton with earbuds creating a connection between Science and Art. Craft gives children a chance to embrace their artistic side. It enhances the interest to learn the concept in a new way. By involving them in such activities, we build their cognitive, physical and social development.

Research Presentation

Instilling professional qualities within children at a very young age has always been a strategy at BHIS-K. Theertha Madhu of Grade 8 prepared a research work presentation based on the topic- 'Industries' and presented it to her teachers. The presentation was evaluated and feedbacks were given highlighting areas of improvement. This activity has set a good example for creating confidence in children and also enabling them to explore beyond the textbook.

Our Billabongers were caught engrossed in their IAID-LCM instrumental classes. Future musicians in the making!!

Hall of Fame!!

The neophytes in Gymnastics from BHIS-K, Aananthitha of Grade 5, Jensi Sharon and Prajith of Grade 4 participated in an interschool gymnastic tournament held last week. Their ability to twist, bend and do mid-air tricks was applauded by the audience and they were recognized for their efforts.

The Aspiring Footballers of Billabong High International School Kelambakkam won the 4th place in an Inter-school Football Tournament held last Saturday!. They were also awarded the Best Team in terms of Fair play. Hearty congratulations to our school football team !!

The Arab Tree

The 6th Graders as a part of culminating their learning on Arab culture and its influence on the world created an all exclusive Arab tree. The leaves of the tree described the various fields in which the Arab culture has an ancestral connect with various cultures of the world.

Popcorn Quiz

The 5th graders had a fun time revising their topics for the examination by taking part in a pop-corn quiz. They popped up like corn kernels when they knew the right answer thereby making the quiz a kinesthetically active one.

Trace the pathway

The 7th graders traced the pathway of the blood through the heart by making a room-sized model of the circulatory system and role-played as oxygenated and deoxygenated blood. As they passed through various parts of the circulatory system they labeled the part and talked about its features thereby recapitulating the concepts through an active session.

गिनती सीखो शब्दों में

छात्रों को हिंदी के अंक और शब्दों को अलग अलग लिखकर और मिलाकर दिया गया था। उन्होंने अंकों और शब्दों को मिलाकर गोल घेरे में चिपकाया। इस क्रिया कलाप के माध्यम से छात्रों ने हिंदी के अंकों का ज्ञान प्राप्त किया। छात्रों ने अंकों को शब्दों में मिलान करना भी सीखा। इस कार्यकलाप में छात्रों को एक दूसरे की सहायता करते हुए देखा गया। गिनती सीखने की इस शिक्षण विधि द्वारा छात्रों में सहयोग की भावना का विकास करने की कोशिश की गई।
