Sense of Touch

A Nursery Activity

Senses are how the human body observes and interprets the world all around us. There are five different senses: touch (using our skin), taste (using our tongue), smell (using our nose), hearing (using our ears), and sight (using our eyes). Our nursery students explored the sense of touch using different types of household objects such as soft toys, coconut, scrubber, paper, glue, building blocks, cotton, cello tape, etc. All students were excited to touch and feel the textures like soft, smooth, hard, rough, bumpy, and sticky. Finally, as an activity, we made a hand-cut out and glued different textured objects on each fingertip and wrote the texture word on the finger. This activity did a great job of reinforcing the sense of touch.

- Mom and Me-An Anthakshari gata (Grade 1-2)
- The 80's Retro Model (Kindergarten)

Deadline to share your video/photos: 23rd November
 Deadline for Registrations: 20th November

Virtual Field Trips of Senior Kindergarten students

A Senior Kindergarten activity

This week our Senior Kindergarten students learned about the health care professionals and people who work in the entertainment industry. To grab their attention and increase their engagement during their virtual class, we went on not one but, two field trips. Our first virtual field trip was to a Veterinary Hospital, and our little learners learned how a veterinarian checks the animals using different medical instruments and provide care for the animal. And our second virtual field trip was to a Music Store, where our students learned about the different musical instruments, musical notes, and how a singer and musician use the musical notes to create songs. Here are some pictures from our virtual field trips, depicting our learning moments.

Osteologists in the making!!!

A Grade 2 activity

As part of learning, Grade 2 is learning about skeletal systems. The skeleton makes up a framework that supports the body and protects the organs. The skeleton consists of the bones and joints of the body. In the human body, there are 300 bones at birth, these then fuse together to make 206 bones. Our second graders had tried creating skeletons and labelled the joints. They created skeletons using earbuds, straws, matchsticks, and pasta. We as educators are so proud and amazed at their creativity.

जल ही जीवन है

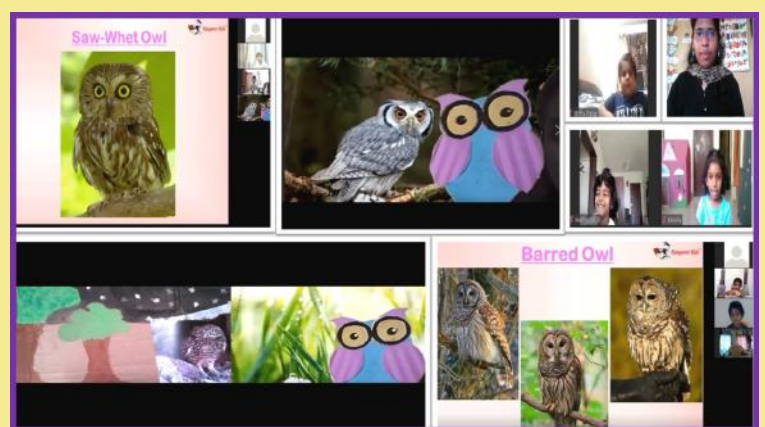

Savitha Kodakkat (Primary School Educator)

जल ही तो कल है ! कक्षा -2 के विद्यार्थियों ने जल प्रदूषण को बहुत ही चाव से सीखा । उन्होंने अपने विचारों को चित्रों और शब्दों का रूप दिया । छात्रों ने 'जल ही जीवन है' -विषय पर पोस्टर बनाए । इस कार्यक्रमलाप से उन्होंने बहुत ही आसान तरीके से पर्यावरण को सुरक्षित और स्वच्छ रखने की महत्व जाने । साथ -ही -साथ छात्रों ने जल प्रदूषण का दुष्प्रभाव के बारे में ज्ञान आर्जित किया और समझे की वे एक जिम्मेदार नागरिक कैसे बन सकते हैं ।

The Land of Owls-story day A Junior KG Activity

Our kindergarteners have visited the world of owls and learnt about their different traits. They enjoyed the story about Bob the owl, who wished to be a friend of the owls he encountered on his first journey outside his forest.

Learning from an Expert!!! Khenisha K Reddy, Grade 5 Student

“A doctor is a person who is behind so many smiles.” We Grade 5 students of Billabong high had an opportunity to meet Dr. Rehab Nainar virtually. It was a such an exciting moment when Dr. Rehab ma’am logged in our class, the session was quite insightful with so many take away, she also cleared all our queries regarding this pandemic situation and taught about the safety measures to be taken during this time. Ma’am also taught about certain protocols to be followed while giving the first aid. Overall it was an amazing session and a new experience. I would like to thank Dr. Rehab and all the doctors who are working for the better tomorrow.

SUPER SORT!

A Grade 3 Activity

Random words will not make a meaningful sentence, and a sentence that has no meaning does not convey a message. A sentence has a structure of its own.

This is what our tiny tots of Grade 3 discovered while doing the activity. They were introduced to some new terms "Subject and Predicate". They understood the importance of the structure of a sentence and excitedly engaged themselves in the sorting activity.

My very own YouTube Channel

Saathvik Vijay Krishnan (Student Ambassador)

Hello Readers!! I am Saathvik and I am a grade 9 student. I have started a Youtube Channel called Saathvik Vijay. I have started this Channel for sharing my vocal capabilities and also to share some information about things that are happening around us in terms of technology. So please do Subscribe to my Channel !!!
