Life in the Jungle

Ms. Shahana (Nursery Educator)

Our nursery students learned about wild cats and had a great time creating leopard print art. They discovered the differences and similarities between the wild cats.

The Billabong Trends

Genius Hour Presentation - Grade 5

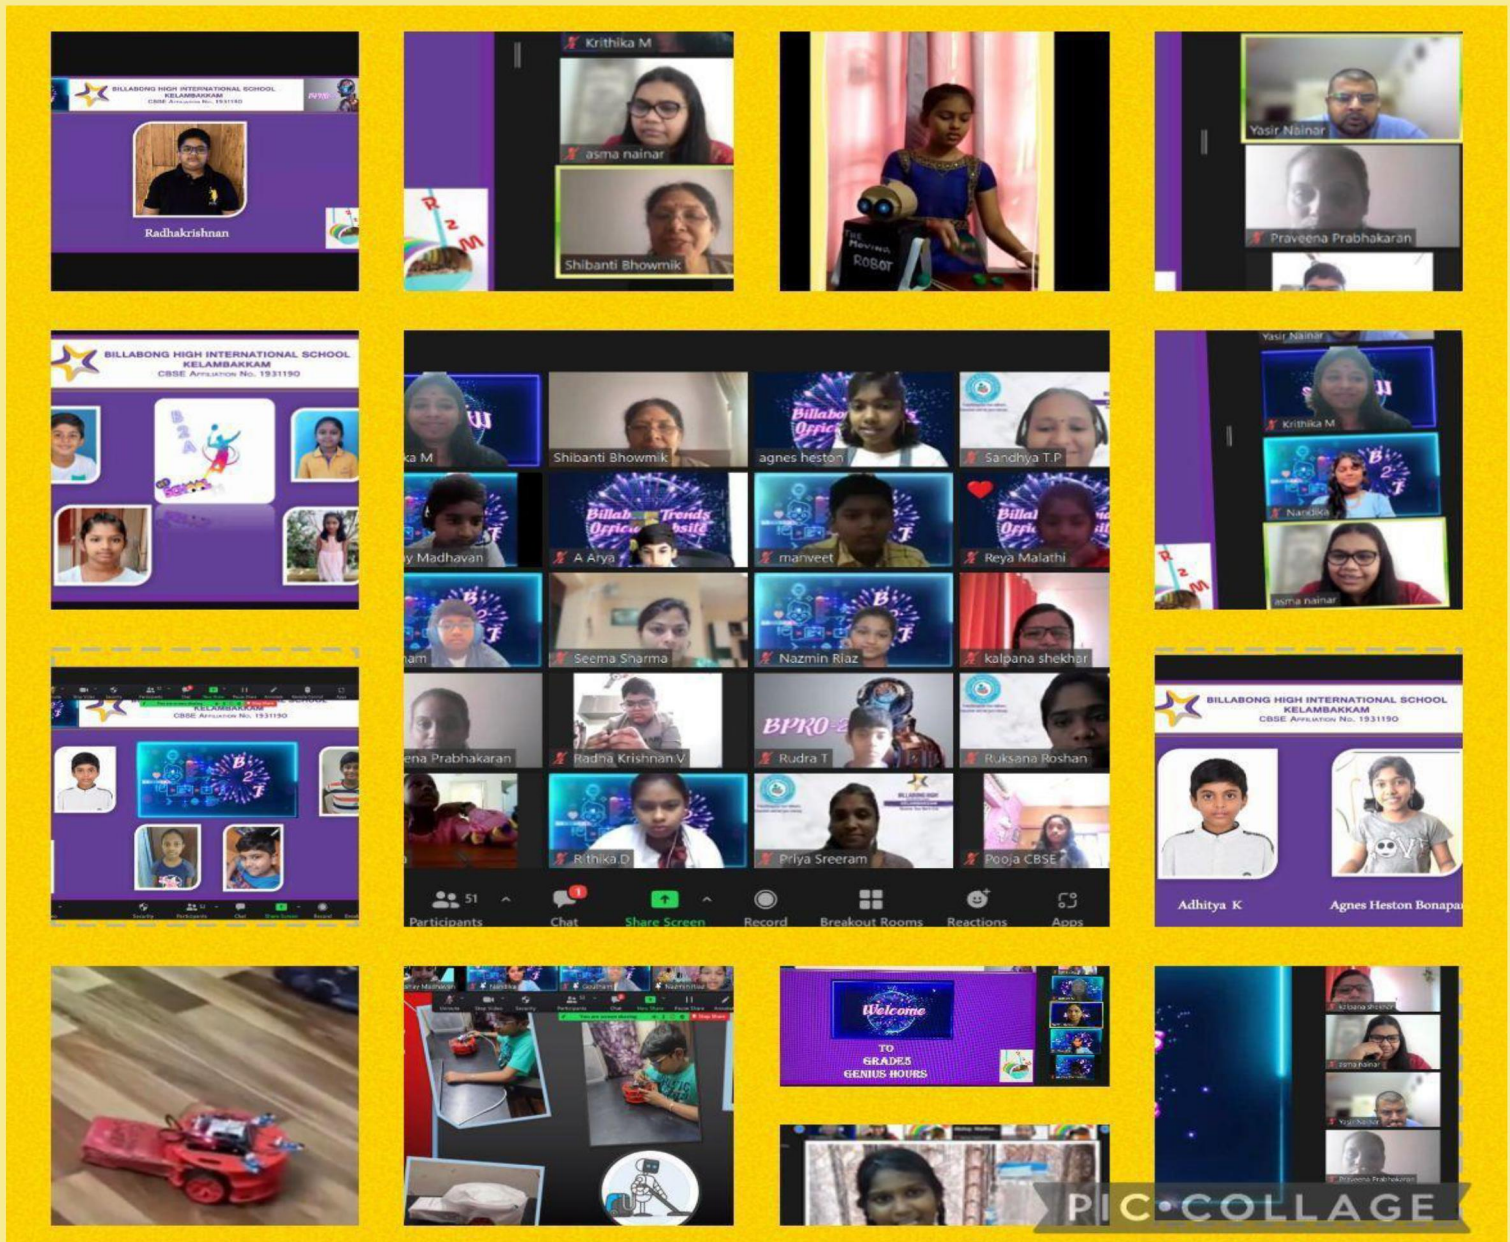

Ms. Steffi & Ms. Krithika (Class Teachers, Grade 5)

“Vulnerability is the birthplace of innovation, creativity and change.” ~ Brene Brown

Innovation does not require some exotic new technology. It requires an innovative culture – one that is embraced by the people at the top and flows through the whole organization.

We executed the Genius hour event for the year 2021-2022 to let the children showcase their innovative ideas and explore it. Grade 5 came up with a mind-blowing project called 'The Billabong Trends'. Collaboration is necessary for innovation. By talking through ideas and problem-solving as a team, the students were creative and innovative. Our students came up with excellent ideas and implemented everything in one website. They, developed their own shopping website to sell their projects which were handmade. They also spread some awareness about how recycling is important to the world now. They also made robots named B-PRO 1 [Clean sweep] and B-PRO 2 [Moving Robot].

Over all, the students learnt new things and presented their project in a genius way.

Save Our Planet – Earth

Ms. Devi. S (Sr. KG Educator)

Earth is the only beautiful planet in our solar system. It is the only planet that has life. Just like we go to the doctor for checkups to help us stay healthy, our planet needs to be taken care of too. This month, our Senior KG students came to know about different methods to save our planet. To spread awareness about saving endangered animals due to deforestation, our students tried to create a poster on the topic "Save Tigers."
