Monsoon Fun

Ms. Sivaranjani. S (Nursery Educator)

It is the monsoon; a season to explore. It is refreshing to see new growth sprouting up, insects busy buzzing, flying, and working. Bugs are everywhere! These small but mighty creatures may seem pesky yet many insects have very important jobs. Children love to learn about all the creepy crawlies around them. This week, our Nursery students had the theme of insects and went to visit the school garden to explore the plants, bugs and creepy crawlies there. The children were incredibly excited to spot a few creepy crawlies like ants, bees, earthworms, and butterflies during the visit.

Around the World

Ms. Sri Kirubashakti (Sr. KG Educator)

Presenting a few glimpses of our Senior KG students exploring the 'All Around the World' theme. The students learnt about the salient features, festivals, flags, and currency of different countries like India, China, and Japan. As a part of their learning, beautiful Chinese lanterns were made.

Math Matrix

Tanisha. K (Grade 6 CAIE)

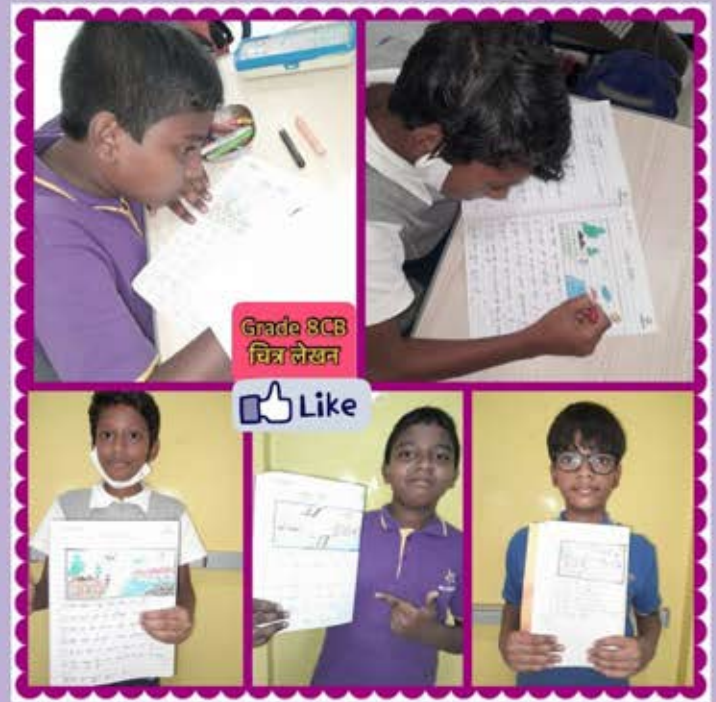

We Grade 6 CAIE students were learning about different types of polygons this week. As a team, we built a different shape using straight lines. The game was interesting as our team representative had to pick the polygon according to the properties given and recreate the same. With those polygons, we created new shapes and found a number of vertices, edges and faces in the new compound shape. We were able to connect the learned concept with the 3D shapes and different views of 3D shapes.

मेरा चित्र, मेरे विचार

Ms. Kalpana Kumari (Hindi Educator)

चित्र लेखन एक ऐसी गतिविधि है, जिसमें छात्र अपने विचार शक्ति का विकास करते हैं। इसी उद्देश्य की पूर्ति के लिए छात्रों एक चित्र बनाया और उस पर अपने विचार लिखे। इस क्रिया कलाप में छात्रों की रुचि सराहनीय थी।

CBSE Workshop on Financial Literacy and Use of Digital Tools

Ms. Anam Agha (Primary Educator)

Financial literacy helps people in becoming independent and self-sufficient. It empowers you with the basic knowledge of investment options, financial markets, capital budgeting, etc. The utilization of technology has increased and continues to evolve for all social and economic purposes around the world. Digital financial literacy combines the skills needed to navigate financial services with the skills to use digital technologies. Technology such as internet browsers and mobile devices may help or hurt access to financial tools.

This week, a few of our CBSE educators had the opportunity to attend a workshop on financial literacy at Hindustan International School, Sholinganallur. The speaker, Mr. C.A Rajamani, shared various platforms where one can start planning their savings for retirement. Saving now for retirement will ensure that you have enough money to enjoy a comfortable standard of living when you stop or reduce the number of hours you work.

One key takeaway from the session was that we, as consumers, will need to have a higher level of financial sophistication to make effective use of financial technology products and services as well as avoid fraud and costly mistakes.

This was a very helpful platform for teachers to understand and start planning for themselves. All doubts and queries were resolved efficiently.

We thank our Principal, Ms. Asma Nainar as well as the CBSE team for allowing us to participate in this workshop.

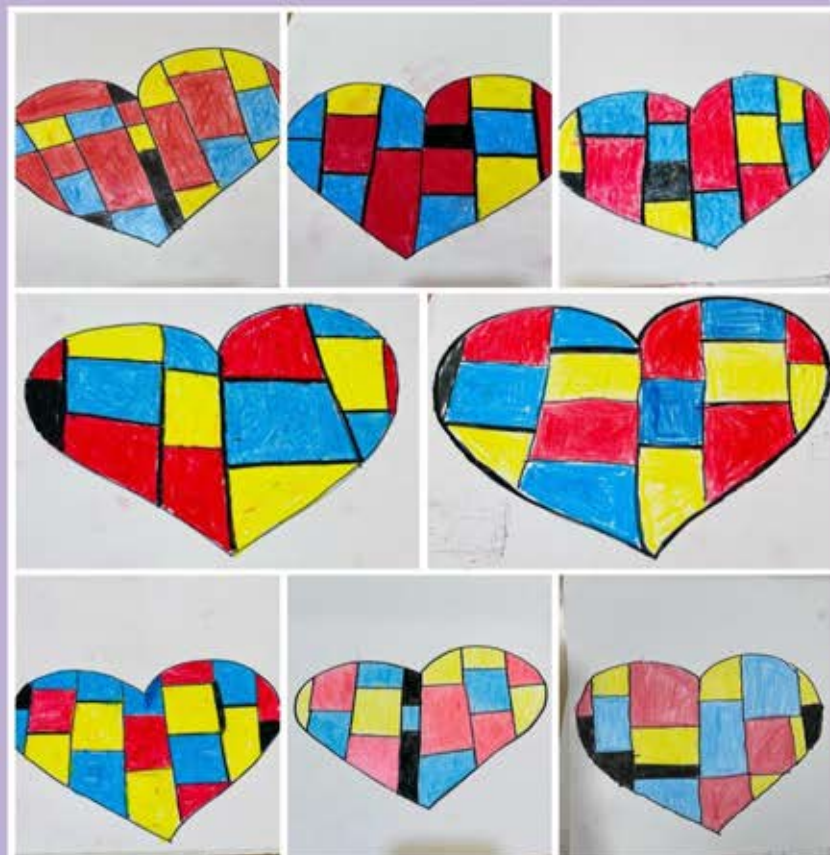

ART CORNER

Grade 1:

The students of Grade 1 expressed their love and care by creating a heart using Piet Mondrian's art technique.

Grade 3: Joan Miro's Art

Students exhibited their favourite things by composing abstract art. They demonstrated Joan Miro's art technique and created these surrealist artworks.

Ms. Shalini. D (Art Educator)
