Fruity Fun

Ms. Sivaranjani. S (Nursery Educator)

Fruits and vegetables are an important part of our daily diet. Our nursery children were taught to make healthy food choices with the fruit basket activity. They learnt that fruits contain vitamins, minerals, and antioxidants that are vital to health and help fight illness. The activity added to the fun when the tiny tots enjoyed coloring different fruits having a hands-on experience in making a fruit basket by themselves.

The Winged Magic

Ms. Devi. S (Jr. KG Educator)

Role play is a subtle way to learn the most important aspects of life such as transformation and evolving to become a better person. Our Junior KG students learned about the magical life cycle of the butterfly through the story, 'The Hungry Caterpillar'. They recreated and explained the story using props and did the bottle cap printing to represent the hungry caterpillar on paper using green paint. To recall the caterpillar's transformation in four stages during their lifetime to become a beautiful butterfly, they curled up like an egg, crawled like a caterpillar, stood still as a pupa, and finally flew like a butterfly. .

Around the World

Ms. Sri Kirubashakti (Sr. KG Educator)

Festivals are the dynamic feature of a community bringing togetherness and enthusiasm. By taking a virtual tour 'Around the world' our senior kg students became aware of the festivals celebrated in various countries. As part of their learning they made 'FEATHER MASK' characteristic of the Brazilian Carnival celebration.

भारत की ऋतुएँ

Ms. Seema Sharma (Primary Hindi Educator)

Seasons

ऋतुओं का जो सुंदर क्रम हमारे देश में है, वो दूसरे देशों में नहीं पाया जाता है। प्रत्येक ऋतु की अपनी पहचान होती है। हेमंत, शिशिर, वसंत, ग्रीष्म, वर्षा, और सरद जैसे ऋतुओं हमारे देश को बाकियों देशों से अलग रखती है तथा हमारे देश को अलग पहचान उपलब्ध कराती है। ऋतु को कई लोग मौसम कहकर उसका आगमन करते हैं। कक्षा ४ में हिंदी विषय में भारत की ऋतुओं के विषय में बताया गया और छात्रों ने ऋतुओं को पहचान कर अपनी मनपसंद ऋतु के विषय में अपने सहपाठियों के साथ ऋतुओं के बारे में अपने विचार साँझा किए। इस गति विधि को ज़रने का उद्देश बच्चों को हिंदी में ऋतुओं के नाम सिखाना और नए शब्दों को सिखाना है।
