## A CULINARY ADVENTURE IN THE CLASSROOM

Ms. Menaka (Middle & High School English Educator)

Cooking in class was more than just a lesson; it was a memorable adventure. It taught us valuable life skills, encouraged teamwork, and ignited a passion for culinary exploration. Beyond the delicious meal, we learnt NARRATIVE Writing part of English class. This culinary experience in the classroom was a reminder that learning can be both fun and practical, leaving a lasting impression on our young minds. It was a day when the classroom turned into a kitchen, and we left with full hearts and satisfied taste buds and homework to do.

This activity brought about understanding of the sequence of the dishes they made, and they had a whale of a time doing the same.

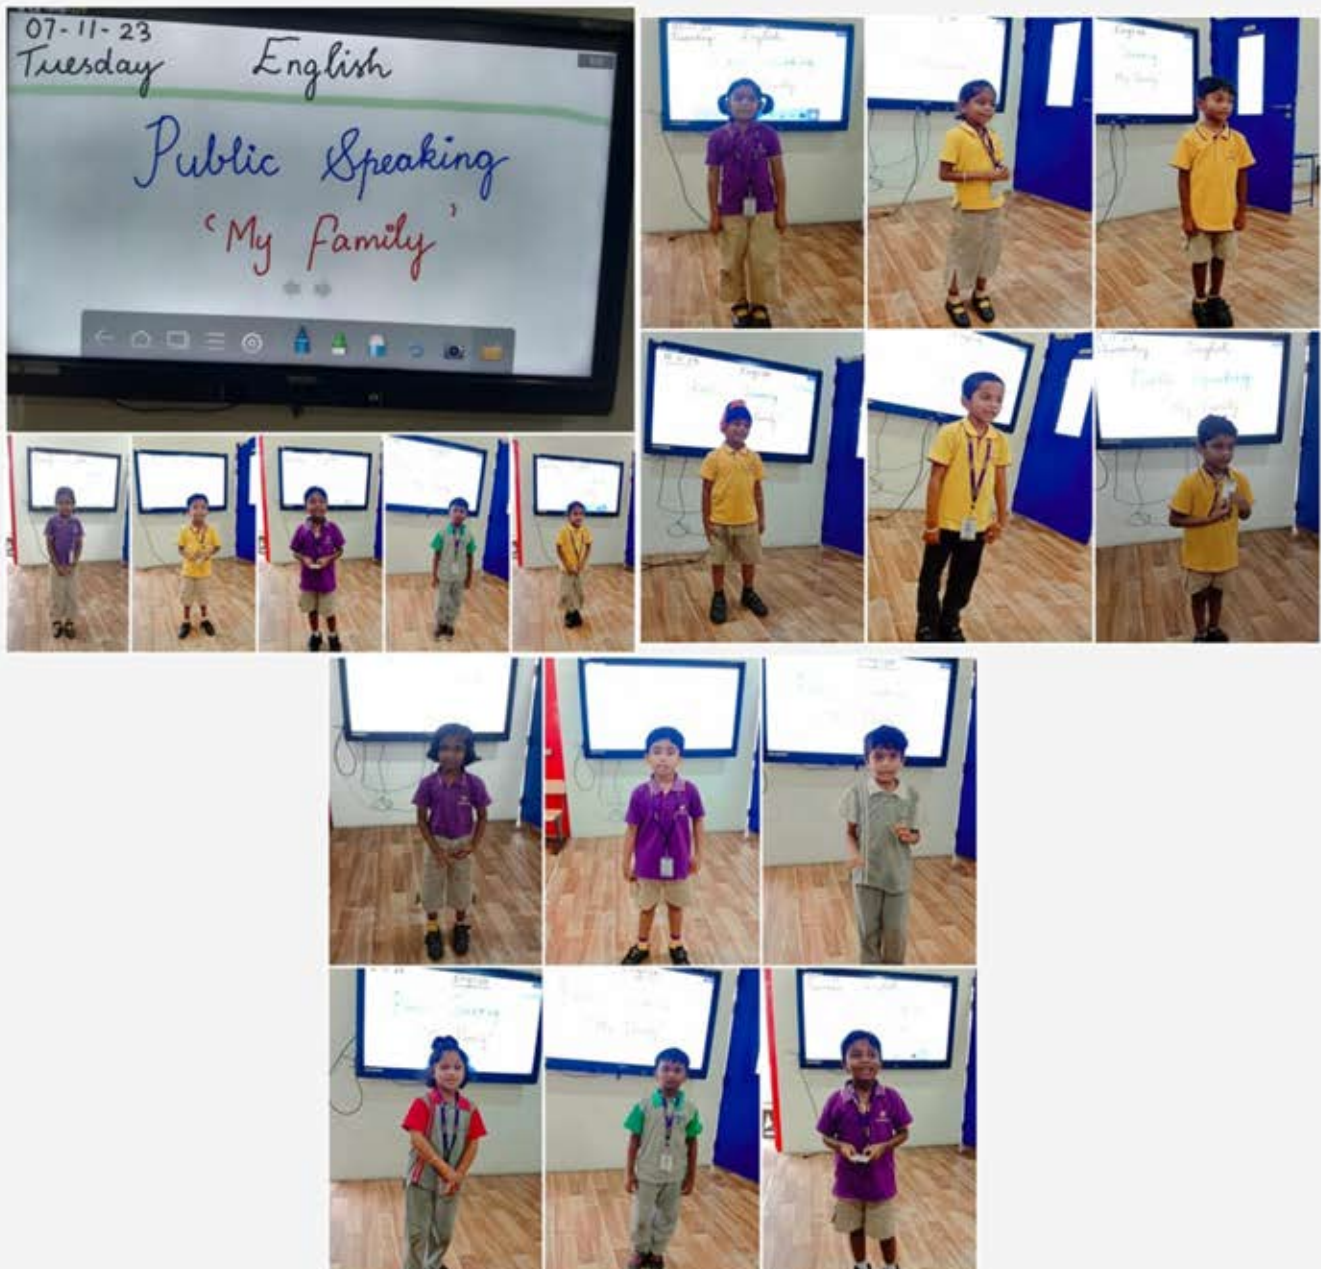

# #2

## PUBLIC SPEAKING

Ms. Sneha & Ms. Suhasini (Grade 1 English Educators)

Every week, the students of Grade 1 have been practicing public speaking in their class with general topics like, 'About Me', 'My Favourite Fruit', 'My Favourite Vegetable', 'My Family'. Each Student will speak 5-8 lines from the given topic. It challenges the children to think on their feet and develop an analytical mindset towards problem-solving. Public speaking also encourages critical thinking, logic, memorization and other cognitive skills as they make their way in the world. Public speaking increases the student's confidence while interacting with others. From this, the students also learn new vocabulary by listening to their friends and they end up eagerly waiting for the next week.

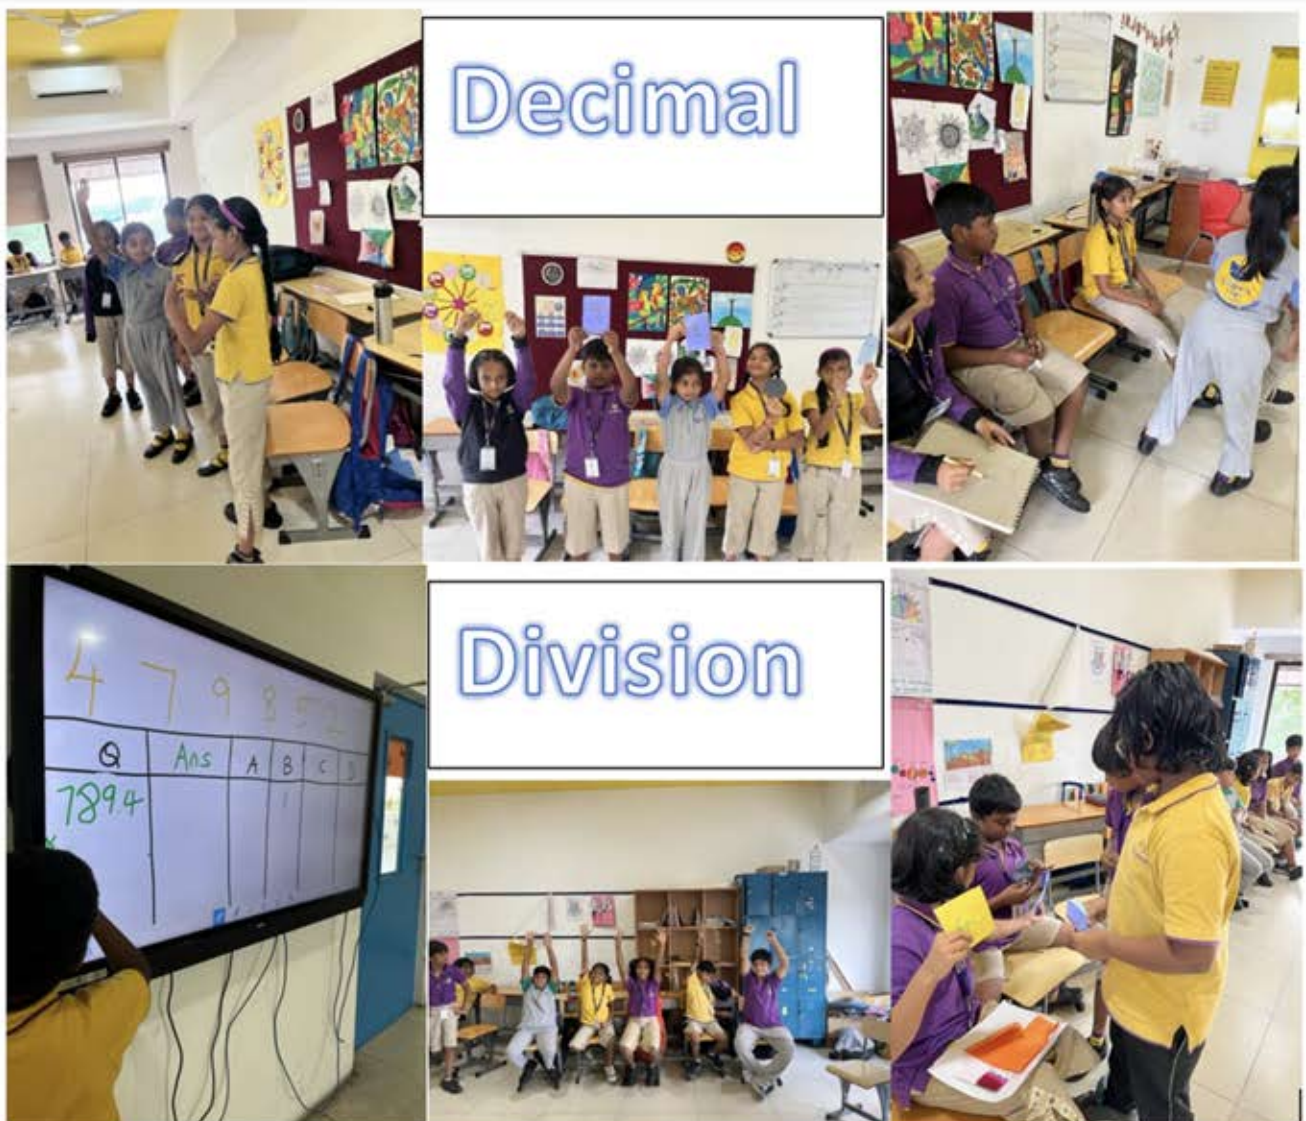

# #3

## D2 DIVISION OF DECIMALS

Ms. Abinaya (Grade 4 Maths Educator)

The Grade 4 class was divided into 4 teams, each team was allowed to form a question and rest of the teams were encouraged to find the answers. The answers were displayed with the help of the number of cards along with the decimal point. Learners were so curious to do the activity, that their interest made them to move ahead to a good understanding of the topic, division of decimals. It was a knowledge filled activity.

## MAKE A JEWEL - OUT OF A GEOMETRIC SHAPE ??

Ms. Saradha & Ms. Abinaya ( Grade 2 Maths Educators)

Shape patterns are sequences of shapes that are repeated in an orderly manner. The shapes used in the sequences are various 2D shapes, such as circles, rectangles, and squares or the images of other objects such as arrows, chocolates, spoons, stars, and many other images.

To make learning more interesting, the learners decided to become the designers! They designed their own jewels out of geometrical shapes. The boys made beautiful & colorful bracelets, the color combinations and the patterns were fantastic. The girls made mesmerizing necklaces. The astonishing fact about the kids were their choice of shapes and the color combos they used, each jewel looked real, it made me think too, to make one. Thank you, math, you make them think, math is, really fun!

## ACHIEVEMENTS AND AWARDS

Ms. Suhashini (Grade 1 B Educator)

The school is happy to share that **Bobba SaiRuthvika, Hirudhaya and Adithi of Grade 1 B** have participated in Aryabhata Maths Olympiad and received an appreciation certificate and medal for the same

Green is the colour of Nature and Environment. The day began with the fun filled introduction concerning the colour Green. The motive of celebrating Green day was to make the students aware of how colour makes our world a better place and significance. Our little one's looked gorgeous in their green attires and confidently participated in the show and tell activity by talking two lines about the green objects which they brought. The concept of colours was reinforced through various activities like colour rhymes, observing the real objects & leaf printing activity.

## MOBILE BIRD HANGINGS

Ms. Shahana Asrar (Junior Kindergarten Educator)

**Mehmet Murat İldan** -Contemporary Turkish playwright, novelist and thinker

'Not humans, but birds often witness the most beautiful mornings in this world!' - **Mehmet Murat İldan**. Everyone likes birds. Birds are the most fascinating wonders of the world. Our little ornithologists are exploring about the characteristics of birds ,different types of birds, their body parts and their habitats. They also made mobile bird hangings and enjoyed decorating their classroom.

# #7

## SKIP COUNTING BY 2S - HOPSCOTCH ACTIVITY

Ms. Shahana Asrar (Junior Kindergarten Educator)

Early math skills are predictive of later academic success. They can strengthen problem-solving abilities. They can improve memory and concentration. They can develop critical thinking skills. They can improve fine motor skills. They can promote creativity. Our learners are learning about skip counting. They had a practical learning of the concept by hopping on the numbers on the hopscotch number grids. The learning outcome was visible in the learners as they enjoyed taking turns and hopping on the grids.

# #8

## MAKING A DELICIOUS SANDWICH

Ms. Sarala B (Senior Kindergarten Educator)

'Cooking is indeed an art, and it's heartening to see children enjoying it. Senior kindergarten children have turned making sandwiches into a delightful pretend play activity. The outcomes are impressive, with each child creating a unique sandwich. It's not just about the food; they're relishing the process, sharing their creations, and explaining them to their friends. This imaginative culinary exploration is fostering creativity of the children.

PIC·COLLAGE

### "Lost time is never found again"

With this motivating quote, our senior kindergarten kids learned how to read time from a hands-on clock and a visual aid clock with movable hour, minute, and second hands. Children were delighted to learn how to tell time with a clock by understanding the hour and minute concepts. They started creating their own clocks using playdough and sketched numerous patterns of clocks of their choice after learning. It was an enjoyable and interactive session for the young learners.
